9. Pig expert forum

KNOWLEDGE PLATFORM FOR NORTHWEST GERMAN PIG FARMERS

09.02.2020 – **Specialist presentations on relevant and current topics combined with news from the industry: that is the recipe for success of Fachforum Schwein. Pig farmers from the north-west German finishing region met in the Münsterlandhalle Cloppenburg to discuss trends, ideas, industry and feeding topics relating to pigs. We were also there again.**

What will the pigsty of the future look like? Where does the industry currently stand in terms of digitalisation and automation? And finally: What are the viable options after the ban on anaesthetic-free piglet castration? - These were the central questions at the **9th Pig Forum**, which took place on 5 February in the Münsterlandhalle Cloppenburg. The well-attended event was organised by the Lower Saxony Chamber of Agriculture and the agricultural journal "Land & Forst".

deuka and Gelamin present product range

With over 80 exhibiting companies, the adjoining trade exhibition was fully booked again this year. This provided pig farmers with a platform for intensive exchange. The lively discussions between pig farmers and our expert advisors focused on questions of **optimal feeding of sows, piglets and during fattening**. Farmers took the opportunity to inform themselves about the range and the latest products of our brands **deuka** and **Gelamin**.

deuka

Suckling piglet feed particularly in demand

There was particularly high demand for *deuka babito*. The tasty suckling piglet feed made from specially fermented whey powder stabilises the intestinal flora, ensures a strong immune system and contributes to a good development of the digestive tract. *deuka babito* is given to the sow from the 3rd day of life to start feeding and supports rapid feed intake.
