Acquisition of a compound feed plant in Edderitz

DEUKA EXPANDS ITS PRODUCTION CAPACITY

14.09.2026 – **Düsseldorf – deuka Tiernahrung Cremer is set to take over a compound feed plant in Edderitz, Saxony-Anhalt, in mid-September. The new site will produce feed for pets and farm animals. Production is set to begin in October. With this takeover, deuka is expanding its production capacity and strengthening its existing production and distribution structures in eastern Germany. Find out more…**

“The site in Edderitz is the perfect complement to our existing production and distribution structures,” says **Jeroen van Klinken, Managing Director of deuka Tiernahrung Cremer**. “With this additional production capacity, we can manufacture our animal feed closer to our sales markets, **respond more flexibly to customer requirements**and capitalise on synergies in production, storage and distribution between our sites.”

New production capacity for bagged products and livestock feed

The Edderitz site is creating additional capacity for the **production of bagged products for pets and farm animals**. In addition, various types **of bulk animal feed** are to be produced there. The separate mixing and pressing lines enable **flexible production planning** and lay the foundations for the **production of GMO-free animal feed**.

The new site complements deuka’s existing production network. The **additional capacity is intended** to help coordinate production, storage and distribution structures even more effectively. Certification in accordance with standard quality assurance systems is carried out in the same way as at other deuka Tiernahrung Cremer sites.

About deuka Tiernahrung Cremer

deuka Tiernahrung Cremer is the largest privately-owned animal feed manufacturer in Germany. Our core

business is the production of compound feed, mineral feed and specialised feed for cattle, pigs and poultry, as well as for all kinds of domestic and pet animals. Over 730 employees from 23 countries work successfully across our 16 sites in Germany. Together, we produce approximately 2.3 million tonnes of feed (2025). Our plants are among the most modern and largest compound feed plants in Germany. Thanks to our extensive distribution network, which offers close customer support, and our use of predominantly regional raw materials, we are a strong partner to the local farming community.

The product ranges of our brands deuka, Club and Nordkraft are well known and highly regarded by local farmers. In particular, the long-established deuka brand has been used to feed animals throughout Germany and in many neighbouring European countries for almost 100 years. Club and Nordkraft are of great importance in southern and northern Germany respectively. The products of all our brands stand for the highest quality across all areas of animal nutrition.

You can find out more about our company, our products, feeding concepts and brands at www.deuka.de.
