For customers and partners in Europe and around the world

DEUKA WEBSITE NOW ALSO AVAILABLE IN ENGLISH

Feed for cattle, pigs, poultry and pets - produced from predominantly regional raw materials. This is what Deutsche Tiernahrung Cremer stands for. For more than 90 years, we have been a strong partner for farmers and agricultural traders in Germany and neighbouring countries. In order to move even closer together with our partners in Europe and overseas, we are generously expanding our range of information: from now on, all content on www.deuka.de is now also available in English.

Product information, terms and conditions, supplier requirements, certificates, career opportunities: The information offered on our website is comprehensive and multi-layered. Animal owners and farmers can find useful information on how to manage their daily work as well as breeders and employees of the agricultural trade - but up to now everything has been exclusively in German. With the addition of an English language version, deuka is now becoming even more international.

- **It's that easy:** Choosing a language is child's play: Simply click on the globe in the top navigation bar, select the language - and you're done!

We hope you enjoy browsing!
