HIGH-QUALITY FIBRE AND VALUABLE HERBS FOR VITAL HORSES

Düsseldorf - 06/03/2025 | A needs-based and individually tailored diet is essential for keeping horses healthy. With deukavallo StrukturGenuss, deukavallo is expanding its grain-free product range. At the same time, deukavallo KräuterStruktur combines the best of the tried and tested herbal muesli and structured muesli varieties in an optimised recipe. Both mueslis promote digestion and thus also the horse's immune system thanks to their high-quality, structure-rich recipe.

Individual nutritional requirements arise depending on age, metabolism and eating behaviour. The new feed varieties from deukavallo enable **even more flexible customisation** to these requirements. The provision of structure-rich manger feeds is intended to have a **positive influence** on the **feeding behaviour of horses**.

The best combined in one product

deukavallo KräuterStruktur is the merger of the two well-known feeds deukavallo Strukturmüsli and Kräutermüsli. The new variety **combines the best of its two predecessors**. The recipe is based on a

deuka

harmonised herbal mixture of parsley, rosemary, coriander and peppermint. The essential oils of these herbs **support the respiratory tract and strengthen the immune system** - especially in the cold season.

The high proportion of **alfalfa hay encourages chewing and salivation**, which improves digestion. Hasty eaters benefit from the **slow and even feed intake**. The muesli is also rich in **vitamins and minerals**. The recipe contains valuable **linseed and milk thistle oil** as well as **hydrothermally digested maize and barley flakes**, making it ideal for older horses.

Grain-free structural supplement for stress-free eating

Deukavallo StrukturGenuss is a grain- **and molasses-free** supplement with a high proportion of structured fibre from timothy grass. **It encourages chewing, prolongs the feeding time and thus significantly reduces the stress of hasty eaters when eating manger feed.** The soft timothy grass is gentle on the sensitive stomach lining of sensitive horses.

Thanks to its starch and sugar-reduced formula, it is ideal for horses with metabolic disorders such as Cushing's syndrome (PPID), equine metabolic syndrome (EMS), PSSM or laminitis. deukavallo StrukturGenuss can be mixed individually into the existing manger feed ration. By **dispensing with additional mineralisation or vitaminisation**, it does not disrupt the existing micronutrient supply of the ration. For horses with low energy consumption, deukavallo StrukturGenuss **together with a mineral feed provides a complete nutrient supply**. It is therefore also ideal as a standing feed.

With the two new structured muesli products, deukavallo is expanding its range with two feeds that can specifically support feed intake, digestion and the immune system (©Deutsche Tiernahrung Cremer).

About deukavallo

deukavallo is the horse feed brand of deuka companion - a brand of deuka Tiernahrung Cremer. Deukavallo has been focussing on the well-being of horses for almost 50 years. Whether for leisure, sport or breeding horses, promising youngsters or experienced seniors: deukavallo's range offers the right feed for every horse. All products are precisely tailored to the nutritional and physiological needs of the animals. The mueslis, extrudates, mineral and pellet feeds are the result of a constant exchange of experience with animal nutrition institutes, veterinary universities and horse owners and breeders.

Only the highest quality orientation leads to sustainable feeding success. We at deuka companion are convinced of this. For this reason, all our production processes - from the raw material to the finished product - are fully documented and feed quality is constantly monitored. This is how we at deukavallo ensure the best feed quality true to the motto: Naturally good horse feed. www.deukavallo.de
