

STRUKTURGENUSS

High-structure, grain-free supplement for all horses

- The useful addition to every meal to intensively support chewing activity.
- Extends the eating time of each meal - ideal for small amounts of manger feed or for hasty eaters.
- Grain-free, molasses-free and low in energy, but a versatile fibre supplement.
- The soft timothy grass is gentle on the sensitive stomach lining of sensitive horses.
- The starch- and sugar-reduced recipe is ideal for horses with metabolic disorders such as Cushing's syndrome, EMS or laminitis.
- By dispensing with additional mineralisation, it does not disrupt the micronutrient supply of the existing ration.
- In combination with a mineral feed, this results in a complete manger feed ration for horses that need to be fed a low-energy, low-starch and low-sugar diet.

Ingredients

Crude protein	10,60 %
Crude fat	4,50 %
Crude fibre	27,40 %
Crude ash	6,50 %
Calcium	0,69 %
Phosphorus	0,26 %
Sodium	0,09 %
Magnesium	0,09 %
Lysine	0,36 %
Starch	5,10 %
Sugar	5,00 %

digestible energy	8.60 MJ DE/kg
convertible energy	7.20 MJ ME/kg

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

deukavallo StrukturGenuss is mixed into the existing manger feed as required to support chewing activity. Depending on the objective and existing amount of manger feed, mix in 1-2 handfuls to approx. 500 g per meal for a large horse (ponies half).

As sole manger feed for horses with low energy requirements, in addition to hay (per day)

Maintenance/low labour: 0.15-0.3 kg per 100 kg ideal body weight Mineral feed

For a complete diet, deukavallo StrukturGenuss should always be supplemented with a mineral feed (e.g. deukavallo Mineral).
