

AQUAVENT Drinking water additive from essential oils

- aquavent is a drinking water additive for poultry.
- It promotes appetite and supports the immune system of the animals (e.g. after exhibitions or during heat stress).
- It stabilises the microflora in the intestine and thus improves the digestibility of the feed.
- Due to its essential oils, it has a harmonising effect on the stable climate.
- aquavent is particularly easy to use because it dissolves well in cold water and can be mixed in.

Ingredients

Crude fat	18,00 %
Crude ash	0,15 %
Sodium	0,10 %
Moisture	14,85 %

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Essential oils from anise, basil, caraway, cress and sage, among others.

The drinking water additive made from selected essential oils specifically targets feed conversion and thus the actual utilisation of the nutrients contained in the feed.

Feeding recommendation

Recommended dosage: 3 to max. 5 ml per 10 litres of drinking water (e.g. in a watering can)

Can be used all year round or specifically in stress situations (e.g. heat stress or during the show season)
