

GRAIN FEED

Supplementary feed to the laying meal

- deuka Grains Extra and Grains Deluxe are grain mixtures for combined feeding with deuka laying meal or laying grain.
- The feeds are used in a ratio of 1:2 to laying meal or laying grain.
- This ensures that your laying hens receive the feed they need during the laying period.
- Our grain feeds are produced without genetically modified components.

Ingredients

Grains Extra:

Crude protein	9,50 %
Crude fat	2,50 %
Crude fibre	3,00 %
Crude ash	5,40 %
Lysine	0,30 %
Methionine	0,15 %
Calcium	1,55 %
Phosphorus	0,30 %
Sodium	0,01 %

Grains Deluxe:

Crude protein	10,50 %
Crude fat	3,50 %
Crude fibre	3,00 %
Crude ash	6,40 %
Lysine	0,35 %
Methionine	0,18 %
Calcium	1,80 %
Phosphorus	0,28 %
Sodium	0,02 %

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Grains Extra:

Wheat, maize, broken, barley, mussel meal

Grains Deluxe:

Maize, wheat, peas, milo, barley, mussel meal, sunflower seeds, sunflower oil, oats,

Feeding recommendation

Grains Extra:

Feed at a ratio of 1:2 with laying meal or laying grain during the laying period.

Grains Deluxe:

Feed in a ratio of 1:2 with laying meal or laying grain during the laying period.

Ideally, laying meal / laying grain is fed in the morning before hatching and Grains Extra / Grains Deluxe in the evening. The daily requirement for a modern laying hen (hybrid with approx. 1.5 kg body weight) is approx. 120 grams per bird and day. This means 80 g of laying meal / laying grain plus 40 g of grain feed per bird and day.

Always provide fresh drinking water.
