Feeding recommendation

Feed in a ratio of 1:2 with deuka Legemehl SB or Legekorn SB during the laying period.

Ideally, feed deuka Laying Meal SB or Laying Grain SB in the morning before hatching and deuka Grain Deluxe SB in the evening. The daily requirement for a modern laying hen (hybrid with approx. 1.5 kg body weight) is approx. 120 grams per bird and day. This means 80 g of laying meal/legged grain plus 40 g of grain feed per bird and day.

Always provide fresh drinking water.
