

NG ALL-MASH L

Complete feed for laying hens (without genetic engineering)

- deuka NG all-mash L is a complete feed for the complete nutrition of laying hens - without genetically modified components.
- It ensures a supply in line with requirements from the start of laying and supports excellent egg formation.
- The homogeneous meal feed replaces additional supplementary feeding with cereals.
- VLOG-certified - suitable for the production of GMO-free food

Ingredients

Crude protein	17,00 %
Crude fat	4,10 %
Crude fibre	2,70 %
Crude ash	13,00 %
Lysine	0,80 %
Methionine	0,36 %
Calcium	3,60 %
Phosphorus	0,50 %
Sodium	0,16 %
Energy	11,20 %

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Vitamin E	20.00 mg/kg

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

contain other trace elements

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Feed as complete feed for free disposal from two weeks before the start of laying and during the laying period.

A modern laying hen (hybrid with approx. 1.5 kg live weight) has a feed requirement of approx. 120 grams per bird and day.

Always provide fresh drinking water.
