

NG ALL-MASH UNI

Universal feed for mixed stocks (without genetic engineering)

- deuka NG all-mash Uni is a universal feed for chick, young and mature feeding of breed, breeding and laying poultry from the 1st week of life.
- The 2 mm pellets are adapted to the needs of small mixed flocks.
- Provides young poultry with all the important building blocks for balanced growth.
- Is VLOG-certified, thus suitable for the production of GMO-free food and contains no coccidiostat. **VLOG** = Association of Foodstuffs without Genetic Engineering e.V.

Tip: All feed items at deuka that start with all-mash are complete feeds and provide your animals with all the necessary nutrients.

Ingredients

Crude protein	17,80 %
Crude fat	2,80 %
Crude fibre	4,70 %
Crude ash	5,50 %
Lysine	0,80 %
Methionine	0,35 %
Calcium	1,00 %
Phosphorus	0,60 %
Sodium	0,17 %
Energy	11.40 MJ ME/kg

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Wheat, maize, soya extruded meal (steamed), sunflower extruded meal, rape extruded meal, wheat bran, calcium carbonate, monocalcium phosphate, sodium chloride, vegetable fatty acids

Vitamins

Vitamin A	10.000.00 I.U./kg
Vitamin D3	2.500.00 I.U./kg
Vitamin E	30.00 mg/kg

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

contain other trace elements

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Feed as rearing and maturing feed from the 1st week of life to chicken chicks, ducks, geese, ornamental poultry (e.g. pheasants, guinea fowl, partridges) for free disposal. For laying poultry, we recommend supplementing oyster shells or switching to a laying feed (e.g. NG Legemehl Grains Extra or cereals).

Attention: Feed to quails only from the 4th week of life or crush the 2 mm pellets in the first 4 weeks.

Always provide fresh drinking water.
