

PICK-PICK

Grain mixture in addition to laying meal

- Club Pick-Pick is a grain mixture for combined feeding with Club laying meal or laying grain.
- Used in a ratio of 1:2 to laying meal or laying grain, it ensures the needs-based supply of your laying hens during the laying period.
- The feed is free from genetically modified components.

The products of our Club brand are mainly sold by dealers in southern Germany. They are marked with the Club brand logo in the dealer search.

Ingredients

Crude protein	9,50 %
Crude fat	3,20 %
Crude fibre	3,00 %

Calcium	1,55 %
Phosphorus	0,30 %
Sodium	0,01 %

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Wheat, maize, barley, mussel meal, sunflower seeds

Feeding recommendation

Supplementary feed to club laying meal or laying grain.

Feed in a ratio of 1:2 with laying meal / laying grain during the laying period.

Ideally, laying meal / laying grain is fed in the morning before budding and Pick-Pick in the evening. The daily requirement for a modern laying hen (hybrid with approx. 1.5 kg body weight) is approx. 120 grams per bird and day. This means 80 g of laying meal/legume plus 40 g of grain feed per bird and day.

Always provide fresh drinking water.
