

LAYING QUAIL FOOD

Complete feed for laying quails

- deuka laying quail feed is a complete feed for quails from laying maturity.
- Feed for laying quails must have a higher nutrient content than normal chicken laying feed, as the birds can consume less feed in relation to their egg weight.
- The protein and calcium-rich nutrient composition of deuka laying quail feed ensures this high nutrient requirement (e.g. 23% crude protein).
- The short-cut 2 mm pellets ensure an even, beak-friendly feed intake.

Ingredients

Crude protein	23,00 %
Crude fat	3,80 %
Crude fibre	3,00 %
Crude ash	13,30 %
Lysine	1,00 %
Methionine	0,55 %
Calcium	4,20 %
Phosphorus	0,75 %
Sodium	0,16 %
Energy	10.80 MJ ME/kg

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Soybean meal (steam fermented), wheat, maize, calcium carbonate, wheat (broken down), monocalcium phosphate, vegetable fatty acids, barley (broken down), maize (broken down), sodium chloride, Na carbonate

Depending on the production plant, season, availability of goods, etc., slight changes in composition may be possible. The actual recipe and ingredients of the feed can be found on the declaration attached to each feed bag.

deuka

Vitamins

Vitamin A	10.000.00 I.U./kg
Vitamin D3	3.000.00 I.U./kg
Vitamin E	100.00 mg/kg

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

contain other trace elements

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Complete feed for laying quails from laying maturity.

Always provide fresh drinking water.
