

VOMIGO

Laying hens' complete feed - When the red bird mite is in the house

- Club VoMiGo is a complete feed for laying hens from laying maturity.
- The balanced composition provides your hens with all the nutrients they need for reliable laying.
- VoMiGo contains aromatic substances from plant extracts. The red bird mite does not like this smell.
- The flavourings do not affect the taste or smell of the eggs or meat.

Please note that the products of our Club brand are only available from certain traders - mainly in southern Germany - are available. This can be recognised in the dealer search by the Club brand logo.

Ingredients

Vitamin E	20.00 mg/kg

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

contain other trace elements

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Feed as complete feed for laying hens for free disposal two weeks before the start of laying and during the laying period. The daily requirement for a modern laying hen (hybrid with approx. 1.5 kg body weight) is approx. 120 grams per bird and day.

Always provide fresh drinking water.

Note: The feed is a complete feed. Too much food, for example leftovers, should not be added.
