

BASE WITH COCC.

Basic feed with protection against intestinal parasites

- deukanin basis with Cocc. is a basic feed for a safe all-round care of your rabbits.
- By adding a coccidiostat, the pellet feed offers protection against dangerous intestinal parasites.
- The provision of essential nutrients and nutritive substances ensures a balanced supply for your animals.
- Ideal for prophylactic protection of the entire breeding stock - to be used as a cure once or twice a year.

Ingredients

Crude protein	16,00 %
Crude fibre	17,00 %
Crude fat	3,00 %

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

contain other trace elements.

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Use as a complete feed.

	Intended use	deukanin basis with Cocc.
Young rabbits	<i>Prevention of coccidiosis</i>	targeted increase (<i>continuous feeding is not recommended</i>)
all rabbits	<i>Coccidiosis prevention</i>	As a targeted 4-6 week treatment 1-2 times per year in the entire herd. (<i>Continuous feeding is not recommended; follow the instructions on the bag</i>)

Use as a temporary cure. The recommended feed quantities are based on the quantities fed so far and are to be adjusted according to the breed's condition and performance. For an optimal ration design, regular weight control is important.
