

DWARF FOOD

Special feed for small-framed breeds & dwarf rabbits

- deukanin dwarf food is suitable for the successful breeding and rearing of small-framed breeds and dwarf rabbits.
- Its reduced energy and starch content makes it easier for the breeder to prevent unwanted overweight. Nevertheless, the animals come to the show in top condition.
- The added mannan-oligosaccharides stabilise the digestion, the vitamin E promotes the fertility of the breeding animals and the highly digestible calcium formate prevents urinary gravel, which is feared in small breeds.
- Herbal extracts for the stomach, respiratory tract and blood circulation increase the animals' well-being and additional methionine ensures a shiny coat for the show.

Ingredients

Crude protein	16,00 %
Crude fibre	17,50 %
Crude fat	2,50 %
Calcium	0,80 %
Phosphorus	0,60 %
Sodium	0,14 %

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Lucerne meal, wheat bran, oat hull bran, sunflower extract, barley, ZR molasses, rapeseed extract, wheat, sodium chloride, yeast extract, fennel, peppermint, parsley, molasses, thyme, cumin

Vitamins

Vitamin A	10.000.00 I.U./kg
Vitamin C	500.00 mg/kg
Vitamin D3	1.200.00 I.U./kg
Vitamin E	80.00 mg/kg

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

other trace elements

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Feed quantities in grams per kg body weight and day (as complete feed for small breeds and dwarf rabbits)*

		deukaninDwarf food
Rabbit	<i>Breeding Chest</i>	30-35 g
	<i>low-bearing</i>	30-40 g
Male	<i>less active</i>	30-35 g
Young rabbits	<i>for breeding</i>	30-35 g
all rabbits	<i>in preparation for breeding shows</i>	30-35 g

*When used as supplementary feed to hay, grass, carrots or similar: reduce the indicated feed quantity up to 50 %.

The recommended feed quantities are for orientation and are to be adjusted according to the breed's condition and performance. For optimal ration design, regular weight control is important.

Note on breeds:

Small & dwarf breeds: Weight up to approx. 2 kg such as small rams, linchinchillas, small pinschers etc.
