

HERBS & PARSLEY

Special food for rabbits - and also for guinea pigs

- deukanin fit herbs & parsley is a special feed for young rabbits from start to weaning phase.
- In addition, its use is ideal for show preparation and in stressful situations during the show season.
- This is because deukanin fit is equipped with the Prodigest concept and thus supports the digestive system of the animals.
- The Prodigest concept includes a reduced starch content, special highly effective raw fibre structures, prebiotic additives and a selection of special herbs. All this strengthens the intestines and the sensitive digestion of rabbits.
- We use high-quality calcium formate as a source of calcium. This is easily digestible and prevents urinary gravel, which is dreaded in small breeds.
- The high vitamin C content strengthens the young rabbits' defences. And because of the high vitamin C content, deukanin fit is also suitable for guinea pigs. Since guinea pigs cannot "produce" it themselves in the body, they need higher amounts of vitamin C in the feed.

Ingredients

Crude protein	17,00 %
Crude fibre	17,00 %
Crude fat	2,20 %
Calcium	0,80 %
Phosphorus	0,60 %
Sodium	0,20 %

For individual values, there may be slight deviations in content between the supplier plants.

List of ingredients

Lucerne meal, oat hull bran, sunflower extract, wheat semolina bran, barley, ZR molasses, soya extract (steam fermented), sodium chloride, yeast extract, fennel, parsley, peppermint, lemon balm, thyme, caraway seeds

deuka

Vitamins

Vitamin A	10.000.00 I.U./kg
Vitamin C	500.00 mg/kg
Vitamin D3	1.000.00 I.U./kg
Vitamin E	100.00 mg/kg

For individual values, there may be slight deviations in content between the supplier plants.

Trace elements

contain other trace elements.

For individual values, there may be slight deviations in content between the supplier plants.

Feeding recommendation

Feed quantities in grams per kg body weight and day (as complete feed for rabbits)*

		deukanin fit herbs & parsley
Rabbit	<i>Breeding chest</i>	30-40 g
	<i>low-bearing</i>	35-40 g
Male	<i>less active</i>	30-40 g
Young rabbits	<i>Weaning phase</i>	increase selectively
	<i>for breeding</i>	30-40 g
all rabbits	<i>in stress phases</i>	30-40 g
	<i>in preparation for breeding shows</i>	30-40 g

*When used as supplementary feed to hay, grass, carrots or similar: reduce the indicated feed quantity up to 50 %.

The recommended feed quantities are for orientation and are to be adjusted according to the breed's condition and performance. For optimal ration design, regular weight control is important.

All animals must always have fresh and clean drinking water at their disposal.

For guinea pigs:

Daily feeding amount in maintenance requirement 20 - 35 grams per kg body weight. In addition, offer best quality hay and fresh drinking water for free disposal.
